

Assouad dimension and fractal geometry: *errata*

Jonathan M. Fraser

March 10, 2021

I will use this document to keep track of any *errata* found in my book. The page numbers refer to the published version, which differ from the arXiv version.

1. page 204, line 10: “Assouad dimension” should be “Assouad spectrum”.
The point here is that there is control on how Hölder maps distort the Assouad spectrum, but we cannot control how the Assouad dimension distorts in general.
2. page 207, line 2: “ $k = l$ ” should be “ l ”
3. page 247, line 1: spacing between \mathbb{R}^d and $d \geq 3$.
